Professional Experience

Since 2011

Executive Director Novabase Business Solutions. In 2012 took overall responsabilities for Novabase Business Solutions, after being responsible for conceiving and coordenating a major reorganization program. This reorganization, which occurred in early 2011, had the objective of focusing, designing and selecting the core IT Consulting offers for each industry sector. Novabase Business Solutions approaches the market with dedicated offers to each industry sector and shares internally a broad group of technical and functional competencies.

Since 2000

Managing Director Celfocus (joint-venture Novabase-Vodafone). Since 2000 is engaged at Celfocus, a company from Novabase focused in the development of solutions for the Telecommunications Sector, both for National and International markets. Initially with operational responsabilities, took later the managing director role. Presently Celfocus has 50% of its business activity outside of Portugal, operating in several countries and geographies. Beyond emergent markets (Africa and Middle East), where it started its first international operations, Celfocus has been consolidating its position in mature Telecom markets (Europe) and also maintaining an healthy operation in portuguese territory, even in the recent economic context.

From 1999 to 2000
