Novabase strengthens focus on the Aerospace industry with acquisition of Evolvespace Solutions

Lisbon, 19 April 2011

Novabase has acquired a 100% stake in Evolvespace Solutions, Lda, a company specializing in solutions for the Aerospace industry, for as much as €251,000.

Evolvespace Solutions provides aerospace consulting services in software virtualisation, control and simulation systems, and develops products in the areas of 3D immersive systems for satellite operation support and high-precision positioning for GPS/Galileo.

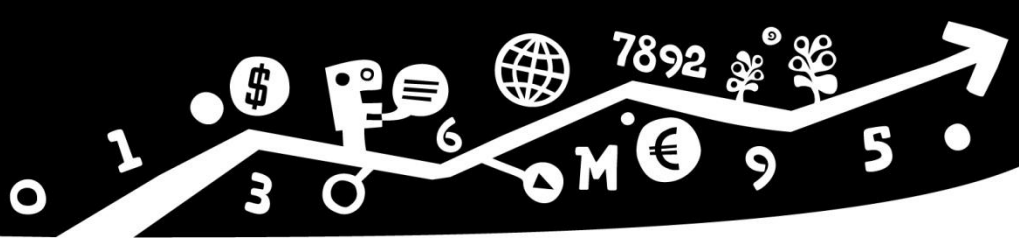

The majority of Evolvespace Solutions' business is international in countries such as Germany, UK, France and Italy, where it carries out projects for customers like the European Space Agency, the International Maritime Satellite Organization and the European Organisation for the Exploitation of Meteorological Satellites.

This investment is part of Novabase's growth strategy for the Aerospace & Transportation industry. Novabase CEO Luis Paulo Salvado says that "Evolvespace is an excellent complement to Novabase's existing assets in this area in terms of teams, customers, products and services. We already had a team of 30 specialists dedicated to this sector in Spain, which is now being strengthened with a competency center in Portugal. I also believe this change will benefit Evolvespace's existing customers, due to Novabase's greater investment capacity in new solutions and our broader product and service scope. This acquisition is in line with our internationalization process, since we are adding to our current portfolio a highly unique set of competencies and offerings in a sector with high potential in the coming years."

Evolvespace Solutions CEO Ricardo Marvão says that "With Novabase, we can be more ambitious in the projects we want to be awarded, together with our focus on more
